

June 2022

NEWS

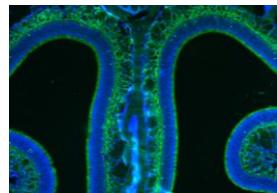

The Assemblée Générale of the Geneva University Neurocenter will take place on Friday, June 10th at 2.00 PM at Campus Biotech, following the NeuroMasterDay, where our Master students will present their current research work in the form of posters. The Assemblée Générale will be the opportunity to appoint the new members of our Committee.

ASSEMBLÉE

OLFACCIÓN

Ivan Rodriguez's team has discovered a large variability in the gene expression profiles depending on the expressed receptors of olfactory neurons and on previous exposure to odors. These results, to be read in *Nature Communications*, highlight a wide range of identities of olfactory neurons and their adaptation to the environment.

EVENT

The international summer school in affective sciences (ISSAS) organized by the CISA will take place from July 7 to July 7th, 2022 at the château of Bossey. This year, the central topic will be "Emotions and well-being".

DECISION

In a recent study, Tobias Brosch's team investigated the cognitive factors that still dissuade many people from switching to electric cars. They found that car owners systematically underestimate the capacity of electric driving ranges to meet their daily needs.
